Bloons TD Battles 6.9.0 Apk and Mod (Money / Medals/ Unlocked) for Android was last changed: December 11, 2020 RevDI There's no doubt that you've heard of Bloons Tower Defense. The classic game started out as an online flash game on PC and later took off on mobile to mass success. There have since been about a dozen games in the Bloons TD franchise. Bloons TD Battles is the first time that players can directly control the balloons themselves. This is a completely online game that puts you up against real players from all over the world. One of you will control the defense against hordes of balloons - as is usually the case in the game - while the other player will control the attacking balloons. The attacking player will control which balloons are used - for example, will you use slow and heavy balloons? Or will you charge the enemy at once with a massive horde of fast-moving balloons to crush them and conquer them in the Soviet way? The new tactics of the new multiplayer element will challenge players in defense to build more robust fortifications to fight the balloons. Never before has the game had such depth. Now, you won't just shoot at the hordes as they come - your opponent may decide to wait for you and slowly attack you in waves - or they may just launch a full-scale offensive that you won't have a chance of winning. Players in attack will be able to choose from different balloons to attack with. Defenders will be able to use any of the 22 towers - each of which has eight unique upgrades. It's a lot of towers to use, and some of them even turn into full-scale military installations. It's like dawn dawn Monkeys. Of course, you won't be able to use all these towers at once - some of them need to be unlocked in later levels, while others will just cost too much money for you to be able to afford them in the early stages of the game. As the game progresses, you will be able to use more creative and destructive towers to rain death on your rubber opponents. Air blow them with an invisible bomber, or blow them apart with plasma cannons. There are many ways to destroy the proverbial balloons, but make sure you have a good mix of weapons that can destroy heavy, armored balloons as well as fast and slightly armored ones that will make the run for it right through your defenses. Remember that your opponent is a different person, not an AI, so expect them to play some smart and naughty moves. The defense tips in Bloons TD Battles attacking your opponent are pretty much as simple as choosing a good combination of light and heavy balloons and using more powerful balloons later in the game. Defense is a more complex strategic issue. In order to defend well at the beginning of the game, you have to directly avoid Tack Shooter. This is one of the weakest towers and really won't do you any good at all. Instead, start the game with ninja towers and sniper towers as well as some other towers like canons to pull out the rest of the balloons. Your opponent will end up using a large number of armored camouflage balloons. This is where ninjas and snipers really come in handy - they will be able to stop these balls in their tracks with ease. Make sure

you have as many of them as possible. Later in the game, you opponent will start using MOABs (Mother of All Balloons). These are destructive balloons and you will have to use specific Moab Maulers that shoot frag bombs to defeat them. There isn't much sense of planning ahead for a later game until it comes. You have to focus on building towers that will defeat the enemies that you are currently fighting and then build the appropriate towers to defeat the enemies later in the game as they appear. Combine an upgraded ninja with a cluster bomb and you can easily defeat most opponents. Keep this strategy in mind in a later game and feel free to spam some ninjas. They're not very effective against your average ball, but their power stoppage makes them super-efficient against more armored balloons later in the game. Make sure you have a good combination of towers to protect against light and heavy balloons and you should be ok until later levels. Just keep an eye out for these MOABs! Bloons TD Battles Mod APK - Unlimited Money If you want the game to go a little smoother, then try into it with unlimited money or unlimited mod medallion. This will allow you to unlock all the best towers as soon as you start playing. Play. Play.
